NextGenerationEU

Ministero delle Imprese
e del Made in Italy

After the 1st edition of June 2023 in Firenze-Italy, DITECFER and its technology-leading members have built this unmissable event for Italian and European organisations, private and public, working in the Railway and Mobility Value Chain.

Learning Accelerator to explore with, and learn from internationally renowned experts and practitioners about **the latest advancements, challenges, and opportunities in AI use** for Industry, focusing on applications for the **Railway sector** and **Industrial processes**.

The Accelerator offers **inspirational talks, presentations and discussions on use-cases, learning demos, experience-sharing** and **valuable networking** during the three days.

The **Award Ceremony of the '11th DITECFER Railway Innovation Contest'** will take place during the event.

Topics include: AI: What it is and what it is not. A metaphysical journey; Legal frameworks for AI in the European Union and overseas: impact on competition and European industries' internationalisation; Resource optimisation in AI: from DeepSeek and new LLMs to value chain decisions; Traditional AI vs. Generative AI: which for which uses, and use-cases for Railways and for Industrial processes; Building AI Agents for Rail and Demo; AI Trustworthiness; Cybersecurity for AI, and AI for Cybersecurity; New AI paradigms in companies: Skills and competences, Datasets Management, Validation of AI-based systems; AI and Safety standards; GenAI technological trends and Demo; AI and Finance: Return on Investment, Collaborative projects and funding; Vision: AI impacts on the future of Railways.

Event for the Digital and Green Transition of the European Rail Value Chain supported by
